Foreword v

Contents vi

Diamond properties as a function of isotopic composition 1
W. F. Banholzer and T. R. Anthony (Schenectady, NY, USA)

Ion implantation and diamond: some recent results on growth and doping 11
J. F. Prins (Johannesburg, South Africa)

A review of the electrical characteristics of metal contacts on diamond 19
K. Das, V. Venkatesan, K. Miyata, D. L. Dreifus (Triangle Park, NC, USA) and J. T. Glass (Raleigh, NC, USA)

A study of diamond laminated surfaces in evaporative spray cooling 25
M. S. Sehmbey, M. R. Pais and L. C. Chow (Lexington, KY, USA)

High quality flame-deposited diamond films for IR optical windows 30
R. Phillips, J. Wei and Y. Tzeng (Auburn, AL, USA)

Solid particle impact of CVD diamond films 35
Z. Feng, (Cambridge, UK), Y. Tzeng (Auburn, AL, USA) and J. E. Field (Cambridge, UK)

Smoothing of chemically vapour deposited diamond films by ion beam irradiation 43
A. Hirata, H. Tokura and M. Yoshikawa (Tokyo, Japan)

Study on the polishing of chemically vapour deposited diamond film 49
H. Tokura, C.-F. Yang and M. Yoshikawa (Tokyo, Japan)

Thin film diamond microstructures 56
T. Roppel, R. Ramesham, C. Ellis and S. Y. Lee (Auburn, AL, USA)

Influence of substrate treatments on diamond thin film nucleation 63
P. A. Dennig, H. Shiomi, D. A. Stevenson (Stanford, CA, USA) and N. M. Johnson (Palo Alto, CA, USA)

Nucleation of chemically vapor deposited diamond on platinum and nickel substrates 68
D. N. Belton and S. J. Schmieg (Warren, MI, USA)

Chemical vapor deposition diamond nucleation induced by sp^2 carbon on unscratched silicon 81
P. E. Pehrsson, J. Glesener and A. Morrish (Washington, DC, USA)

Deposition of diamond films with controlled nucleation and growth using hot filament CVD 91
J. Wei (Auburn, AL, USA), J. M. Chang (Huntsville, AL, USA) and Y. Tzeng (Auburn, AL, USA)

Characterization of polycrystalline diamond thin films grown on various substrates 96
R. Ramesham, T. Roppel, R. W. Johnson (Auburn, AL, USA) and J. M. Chang (Huntsville, AL, USA)

Thermodynamic and experimental study of diamond deposition from a CH_4–H_2 gas mixture 104
J. W. Kim, Y.-J. Baik, K. Y. Eun and D. N. Yoon (Seoul, South Korea)

Nucleation effects and characteristics of diamond film grown by arc discharge plasma jet chemical vapor deposition 112
N. Ohtake and M. Yoshikawa (Tokyo, Japan)

Diamond synthesis in a low-pressure flat flame 122
N. G. Glumac and D. G. Goodwin (Pasadena, CA, USA)

Growth of diamond film by a plug-flow flat flame method 127
F. C.-N. Hong, H.-M. Chang, J.-C. Hsieh, J.-H. Hwand and J.-J. Wu (Tainan, Taiwan)

Structural characteristics of diamond films prepared by thermal chemical vapor deposition processes 133
F. S. Guo and S. C. Yu (Tainan, Taiwan)

Diamond IR optical coatings by hot filament chemical vapor deposition 137
Y.-N. Sun, H.-Z. Yun, W. Guo and J.-Q. Li (Lanzhou, China)

Deposition of smooth, oriented diamond films using microwave plasma chemical vapor deposition 140
F. G. Celii, D. White, Jr. and A. J. Purdes (Dallas, TX, USA)

Low-pressure microwave plasma nucleation and deposition of diamond films 150
Y. H. Shing, F. S. Pool and D. H. Rich (Pasadena, CA, USA)

Habit modification of gas phase synthesized diamond particles in the C–H–O system 156
Y.-J. Baik and K. Y. Eun (Seoul, South Korea)

Formation of functionally gradient diamond films 164
K. Kurihara, K. Sasaki, M. Kawarada and Y. Goto (Atsugi, Japan)

Growth of diamond films on stainless steel 169
H. Chen, M. L. Nielsen, C. J. Gold, R. O. Dillon (Lincoln, NE, USA), J. DiGregorio and T. Furtak (Golden, CO, USA)

Strain in CVD diamond films: effects of deposition variables 173
H. Guo and M. Alam (Socorro, NM, USA)

Studies of stress related issues in microwave CVD diamond on < 100 > silicon substrates 180
J. A. Baglio, B. C. Farnsworth, S. Hankin, G. Hamill and D. O'Neil (Waltham, MA, USA)

Model for the hydrogen atom flux developed in a microwave plasma jet under diamond synthesis conditions 186
S. M. Gasworth (Schenectady, NY, USA)

Diamond growth on a (100)-type step 193
S. J. Harris and D. N. Belton (Warren, MI, USA)

Diamond growth rates *vs.* acetylene concentrations 201
S. J. Harris and A. M. Weiner (Warren, MI, USA)

First-order Raman scattering in homoepitaxial chemical vapor deposited diamond at elevated temperatures 206
H. Herchen, M. A. Cappelli (Stanford, CA, USA), M. I. Landstrass, M. A. Plano and M. D. Moyer (Menlo Park, CA, USA)

Mechanical and adhesion properties of amorphic diamond films 216
F. Davanloo, T. J. Lee, D. R. Jander, J. H. You, H. Park and C. B. Collins (Richardson, TX, USA)

Low hydrogen content diamond-like carbon coatings for KCl optics for high power industrial CO_2 lasers 220
F. X. Lu, B. X. Yang, D. G. Cheng, R. Z. Ye, W. X. Yu and J. B. Sun (Beijing, China)

Electrical and photoelectrical characteristics of heterostructures with amorphous carbon films 226
V. I. Polyakov, P. I. Perov, M. G. Ermakov, O. N. Ermakova, V. M. Elinson and V. V. Sleptsov (Moscow, Russia)

Electronic properties of semiconducting diamond-like carbon–diamond 232
K. K. Chan, S. R. P. Silva and G. A. J. Amaratunga (Cambridge, UK)

Applications of diamond-like carbon films to electronic components 240
H. Nakaue, T. Mitani, H. Kurokawa, T. Yonezawa and H. Yoshio (Osaka, Japan)

Preparation and properties of amorphous carbon and hydrocarbon films 245
F. Richter (Chemnitz, FRG), K. Bewilogua (Hamburg, FRG), H. Kupfer, I. Mühling, B. Rau, B. Rother (Chemnitz, FRG) and D. Schumacher (Düsseldorf, FRG)

Effect of diluent gases added during deposition on the etching characteristics of diamond-like carbon films 251
J. Seth, R. Padiyath, S. V. Babu (Potsdam, NY, USA) and M. David (St. Paul, MN, USA)

Microtribological properties and potential applications of hard, lubricating coatings 256
S. Miyake (Saitama, Japan) and R. Kaneko (Tokyo, Japan)

Tribological study of cubic boron nitride film 262
S. Miyake, S. Watanabe, M. Murakawa (Saitama, Japan), R. Kaneko and T. Miyamoto (Tokyo, Japan)

Diamond-like nanocomposites (DLN) 267
V. F. Dorfman (Stony Brook, NY, USA)

Diamond-like nanocomposites: electronic transport mechanisms and some applications 274
V. F. Dorfman (Stony Brook, NY, USA), A. Bozhko, B. N. Pypkin (Moscow, Russia), R. T. Borra, A. R. Srivatsa, H. Zhang, T. A. Skotheim (Stony Brook, NY, USA), I. Khan (Moscow, Russia), D. Rodichev and G. Kirpilenko (Zelenograd, Russia)

Plasma deposited carbon films as a possible means for divertor repair 282
A. J. M. Buuron, J. J. Beulens (Eindhoven, The Netherlands), P. Groot, J. Bakker (Petten, The Netherlands) and D. C. Schram (Eindhoven, The Netherlands)
